

Option	Description
<b><i>subtree</i></b>	Watches everything under the target. Default: false.
<b><i>childList</i></b>	Monitors addition/removal of child nodes. Default: false.
<b><i>attributes</i></b>	Watches for changes to node attributes. Default: true if attributeFilter or attributeOldValue is specified.
<b><i>attributeFilter</i></b>	Specifies array of attribute names to monitor. If excluded, all attribute changes cause notifications.
<b><i>attributeOldValue</i></b>	Records previous value of changed attributes. Default: false.
<b><i>characterData</i></b>	Monitors changes to character data in target node. Default: true if characterDataOldValue is specified.
<b><i>characterDataOldValue</i></b>	Records previous value of node text upon change. Default: false
